

HELP HEAL HER HEART (Join us via www.HelpHealHerHeart.com)

I had survived a heart attack at the age of 44 and lived on to tell you about this ordeal, and to help many more women to avoid going through the lacking care approach, right at the time when their life may depend on it so much. So, today, on behalf of many women I'd like to ask you to join your voices in support of the pioneering efforts to raise awareness about the importance, of dire need and urgency for the significant expansion of **the research about women's heart**.

Today more women die from the heart disease than from all cancers combined, but very few people are barely aware of this universal problem. And, it is largely due to the lacking interest to conduct the gender-specific research about heart disease in women. So, please, join your voices to help us bring the gender equality into the medical field today and with no more delay!

The collective power of our voices, joined together to help the much needed, long overdue positive change manifest into reality & assure the heart health of many women – your loved ones & friends, who may find themselves in need of urgent & competent care for their heart.

INTRO:

All women's hearts of Paris
Will beat in a healthy way...
All women's hearts in Rome
Will thrive day after day...
Every lady's heart remembered,
Not forgotten in Manhattan!
Please, help women's hearts researchers
In my City by the Bay!

SING ALONG PART – CALL & RESPONSE:

**Help heal Her heart in San Francisco,
Help heal Her heart throughout the world!
Save women's heart, please, be heart-smart!
Share wisdom of your heart
Evolve, be kind, show that you care,
think and dare!**

**Help heal Her heart in San Francisco,
Help heal Her heart throughout the world!
Help women's heart research gain new wisdom
And let all women's hearts be heard.**
